A new abstract has been inserted as follow:

---A cradle motion unit for positioning a test head. The test head has a support structure which provides three degrees of freedom, a first lock, and a second lock. The three degrees of freedom are prevented by actuation of the first lock and second lock. ---

2. Claims 1-21 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 1 and 10 are allowed because the prior art does not disclose a sliding member of the support structure for guiding the test head along three degrees of freedom and a second lock for preventing motion of the sliding member and preventing motion of the test head in two of the three degrees of freedom and in combined with other claimed elements as recited in claim 1. Claims 2-9 depend from allowed claim 1, these claims are also allowed accordingly.

Claims 16 is allowed because the prior art does not disclose an arm support block and a guide block structure and in combined with other claimed element as recited in claim 16. Claims 17-19 depend from allowed claim 16, they are also allowed accordingly.

Claims 20-21 are allowed because the prior art does not disclose the step of positioning the test head with respect to the cradle along a third degree of freedom and steps of actuating first and second locks coupled to the cradle to prevent motion of the test head with respect to the cradle and in combined with other method steps as recited in claims 20-21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
